

PASSION FOR FITNESS

WELCOME TO DHZ FITNESS

We offer a wide range of suitable fitness equipment for the opening of a new gym, right through to the modernisation of your pre-existing gym. We therefore offer you not just premium quality fitness equipment with a wide range of functions, but also a price level which enables you to set up your sport studio at a minimal cost.

We achieve this through a quantitative approach to assembly, the advantageous location of our production centre, as well as low overhead costs – all to your benefit. Consequently, our sales prices are often significantly lower than those of established retailers.

As a result, with the EVOST Series from DHZ Fitness, we are able to offer you easy-to-use and reliably functioning equipment, which scores many points for its appealing and fresh design and very reasonably priced replacement parts. All spare parts are stored centrally on your behalf and can be delivered quickly upon request.

DHZ FITNESS EQUIPMENT OFFERS SAFE AND EASY HANDLING AT REASONABLE PRICES - IDEAL FOR EVERY SPORT STUDIO

Every gym follows its own sets of goals. We consider ourselves to be a more-than-capable point of reference for helping you to achieve your goals with ease. In order to stand one's ground in the highly-competitive

fitness market, costs have to be lowered, whether for sports equipment or for repair services.

We have been a consistently successful company in the sports sector for over 20 years. Nevertheless, strong cooperation also requires trust. We look forward to seeing you in our Showroom in Brandenburg (near Berlin) or others in Europe, where you can take a relaxed look at a representative selection of our fitness equipment, test them, and find out all the information you require.

Our fitness equipment represents quality, reliability and safety, and are designed exclusively for professional use. The advantages of DHZ fitness equipment are:

- easy to adjust or adapt to your body size
- straightforward operating instructions on the equipment
- intuitive operation of the fitness equipment
- fully compliant with safety standards
- favourable price-performance ratio
- competitively priced replacement parts
- reasonably priced assembly and trackable shipping upon request
- solid frame structure
- 2 options for the weight towers in the equipment

Products purchased: Functional Tower E360H, EVOST I series strength machines, smith machine and benches, plate loaded devices, rubber flooring, dumbbells, weight plates.

DHZ FITNESS – ONE OF THE WORLD’S LARGEST MANUFACTURER OF PROFESSIONAL FITNESS EQUIPMENT

DHZ fitness was founded in 2002 and is still owned by the founder. Due to his tireless passion the company relies exclusively on the production of professional fitness equipment and makes about USD 100 million a year. The company philosophy is that DHZ would like to supply the best price and high quality for you as the customer. In order to achieve this goal over 90% of your fitness device is produced in our own factory. This means there are no profit margins of other suppliers – all to your advantage. Likewise, the quality can be better controlled. By efficient production methods such as laser cutting and robot welding we can offer extremely competitive prices.

WHY DHZ? BECAUSE QUALITY BRINGS CONFIDENCE!

There are many reasons to buy your equipment at DHZ. Quality is the most important argument. Our experienced production manager controls a production according to the latest state of the art, monitored by an ISO 9001 quality management. DHZ fitness equipment has been designed for large loads and is suitable for professional use. Precise workmanship of the welds to the upholstery simplify usability and stability.

- ✓ Easy to follow manual
- ✓ Easy adjustment and resizing
- ✓ Intuitive handling
- ✓ Compliance with safety standards

- ✓ For professional usage
- ✓ Clever and modern design
- ✓ Weight options for many devices
- ✓ Simple and reliable handling

- ✓ ISO 9001 Quality Management
- ✓ Modern production
- ✓ High-precision welds
- ✓ Good warranty

- ✓ Top Value
- ✓ Cheap Installation and Service
- ✓ Cheap and transparent transport costs
- ✓ Fast and cheap supply of spare parts

TÜV TESTED! TRUST IS GOOD – EVIDENCE IS BETTER!

In order to prove the quality of the products, a voluntary check of the DHZ device lines was carried out in July/August 2016 from TÜV Austria after German Institute for Standardization DIN EN ISO 20957/2. Safety-relevant-tests contain: cutting or squeezing, tipping tests and stress tests, to ensure the stability of the equipment. The responsible engineer Paul Preissler of TÜV Austria: The prescribed stress test was passed brilliantly - 100.000 repetitions with full weight and over 80% of possible movements. Our infrared thermographic camera could not identify an unusual temperature even after the test.

“The results of this test fulfill our expectations and mirror our high quality standard. It’s a important proof for potential customers as we do not have long time references in the german market” explains David von Hase, responsible for this certification. “Some Gym owners had concerns, now we can delete them all. We will set up this test samples in our showroom, so everybody can see the good condition of our units are after this test.”

THE DHZ STRENGTH MACHINES PASSED THIS TEST SUCCESSFUL, WITHOUT EVEN LEAVING A TRACE OF THIS FATIGUE / DURATION TEST.

OTHER PICTURES AND VIDEOS TO THE TEST YOU SEE HERE: DHZ-FITNESS.EU/QUALITY-EN

DUAL CABLE CROSS “NEW”

- The product developed by an Italian designer offers high variability, so the two arms can each be adjusted separately 12 times in angle and together 11 times in height.
- As a result, the new device forms an enormous number of cable pulling exercises. Highly interesting for fitness and physiotherapy.
- Measure: high 2,00 m / width 1,65 m.
- Weight: 170 kg.
